

PP-145x

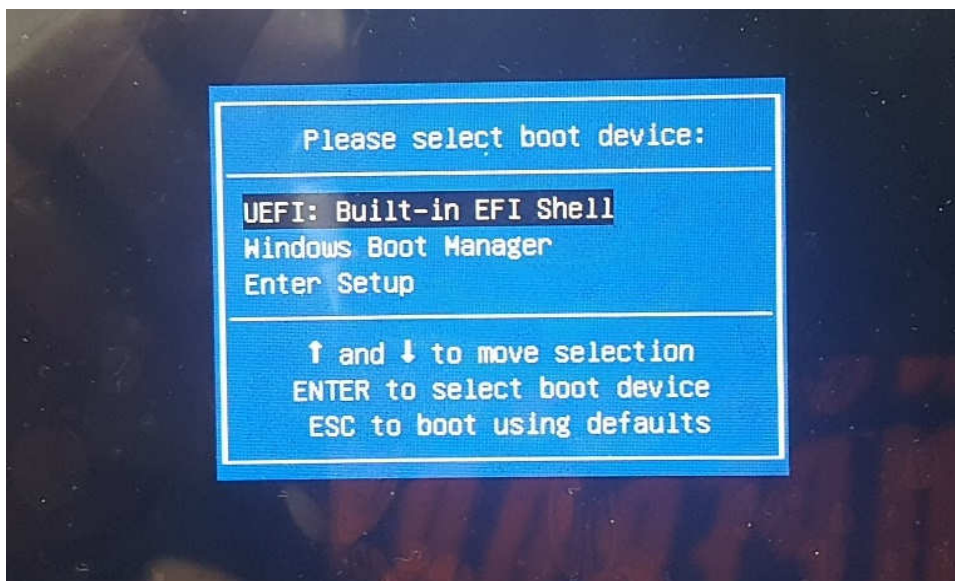

BIOS Update

UEFI

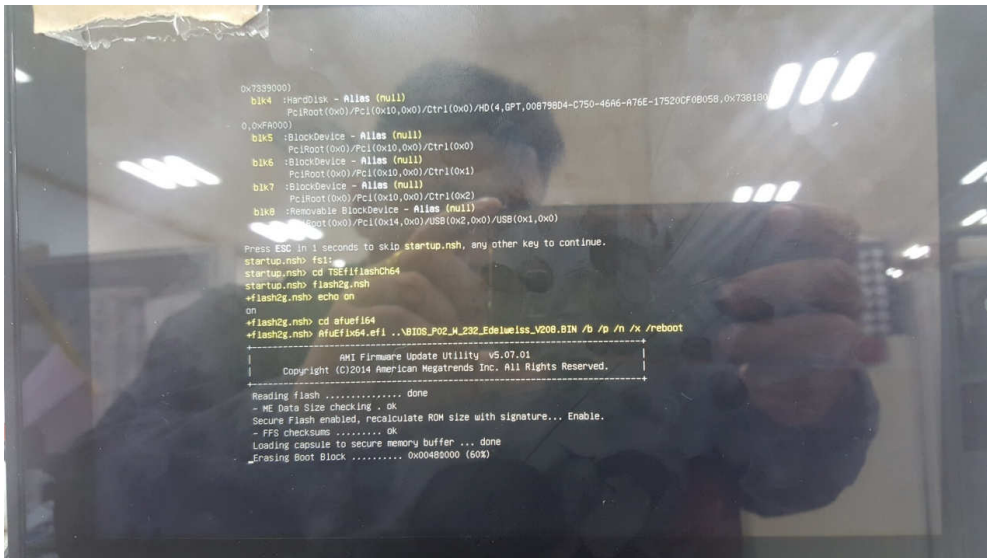

1. Download BIOS Update Package.
2. Place **TSEiflashCh64** and **startup.nsh** on the USB drive root directory

3. Turn on the unit and press the **F7** key to invoke boot menu.
Select **UEFI: Built-in EFI Shell**

4. BIOS update starts automatically.

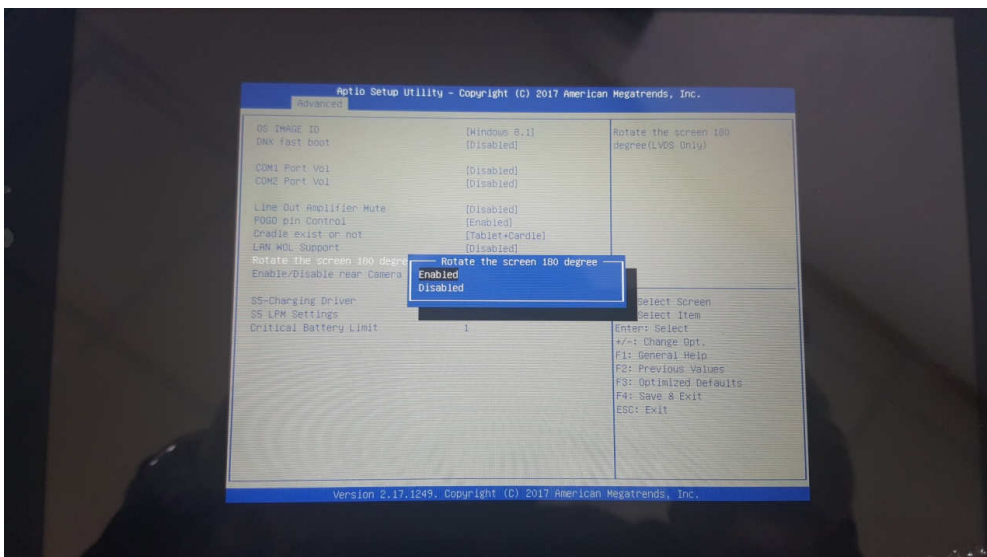

After BIOS update, at the first time power up, the machine will shut down immediately. After that, it will power up normally.

5. When BIOS update is complete, the display will be upside down. Enter COMOS Setup by tapping **Del** key repeatedly when power up..

Go to **Advanced** → **System Component**

Set **Rotate the screen 180 degree** to **Disabled**

Set **Enable/Disable rear Camera** to **Disabled**

6. Go to **Advanced** → **Thermal** → **Thermal Configuration**
Set **DPTF** to **Disabled**
